What's New In Heritio?

Heritio is one of those applications that tends to stand out among the huge crowds of software solutions and applications existing online. Its purpose is not really tied to functionality, as much as it is tied to users' desire to understand their past and know their

ancestors. While much of the research will still have to be done in the classical way, with pen and paper, Heritio will help with putting together your finds into a beautifully-generated family tree. Why is Heritio such a big deal? It's not necessarily that this application is a big deal, but rather that it brings to view functions that you wouldn't necessarily think would exist in an application. This family tree creator and editor fits a certain, more niche, public. If you're looking to create a family tree, then Heritio is the right way to go, but if you have no clue as to why or how genealogy is important, then this app is definitely not for you. The interface might seem a little outdated, but don't worry, because behind its interface, Heritio is packed with features. You can edit a template and adjust it for your needs. Add or delete relationships, depending on how your family evolves. Edit the text and make it fit with the rest of your family tree theme. You'll spend a lot of time tweaking your family tree. Operating it just like any other text editor No matter what you're expecting from Heritio, one thing is certain. There really isn't anything new or scary about this application, especially if you have some experience with text editors in general. The concept behind it is almost the same, only difference being a couple of added forms one has to fill in order to have the family tree as complete as possible. 07.02.2011 7/7/2011 4:20:23 PM Joseph This is One of the Best Android application!!! This application is No 1 in Google Play, I just love it, It's very simple. And I just want to mention a problem that I notice in comments, when some user start complaining, they need to uninstall the app and re-install it again. Hope the Developers will check that. 07.02.2011 7/7/2011 4:25:33 PM Dany That's really great..! I love your application. I have downloaded this application few days ago and I think this application is the most suitable one. One more thing is that this application is not available in India so I had to install on my pc where it works awesomely. 07.02.2011 7/7/2011 4:35:25 PM Abha Excellent app. I love it so much. It is perfect! 07.02.2011
